## Module Description Master Environmental Physics (Oct. 2016)

<b>Module title / code no.</b>	01-M01-1-M1-01 Atmospheric Physics
<b>Module assignment / Responsible for the module</b>	Module section 1 / Basics Prof. Dr. John P. Burrows
<b>Appendant courses, course type and SWH</b>	Atmospheric Physics (4 semester weekly hours (SWH) / 2x lecture (L) + 2x example classes (EC))
<b>Workload / credit points</b>	6 CP, 180 h <ul style="list-style-type: none"> <li>• presence (L + EC): 56 h (4 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 56 h (4 SWH x 14 weeks)</li> <li>• preparation for exam: 68 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik Optional compulsory for MSc Physical Geography: Environmental History
<b>Duration / semester</b>	1 semester / winter semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Basics physics of the atmosphere
<b>Content</b>	History of the earth's atmosphere, atmospheric composition, radiation in atmosphere, physical laws, description of radiation and atmospheric radiation transport; Climate change; Atmospheric thermodynamics and hydrological cycle, Aerosols and cloud physics, Introduction into atmospheric dynamics
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes
<b>Literature</b>	English books: <ul style="list-style-type: none"> <li>• Houghton, J.T., The physics of atmospheres, Cambridge University Press, 1977, ISBN 0 521 29656 0</li> <li>• Wallace, John M. and Peter V. Hobbs, Atmospheric Science, An Introductory Survey, Academic Press, 2nd Edition 2005, ISBN 0-12-732951-x</li> </ul>

German books:

- Physik unserer Umwelt: Die Atmosphäre  
Authors: Prof. Dr. Walter Roedel, Prof. Dr. Thomas Wagner  
ISBN: 978-3-642-15728-8 (Print) 978-3-642-15729-5 (Online)

<b>Module title / code no.</b>	01-M01-1-M1-02 Physical Oceanography
<b>Module assignment / Responsible for the module</b>	Module section 1 / Basics Dr. Reiner Steinfeldt / Dr. Oliver Huhn
<b>Appendant courses, course type and SWH</b>	Physical Oceanography (4 semester weekly hours (SWH) / 2x lecture (L) + 2x example classes (EC))
<b>Workload / credit points</b>	6 CP, 180 h <ul style="list-style-type: none"> <li>• presence (L + EC): 56 h (4 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 56 h (4 SWH x 14 weeks)</li> <li>• preparation for exam: 68 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Basics physical oceanography
<b>Content</b>	External forcing, stratification, water mass formation, wind-driven ocean, geostrophy, meridional overturning, role of ocean in climate change
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-1-M1-03 Soil Physics
<b>Module assignment / Responsible for the module</b>	Module section 1 / Basics Dr. Helmut Fischer
<b>Appendant courses, course type and SWH</b>	Soil Physics (2 semester weekly hours (SWH) / 1x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik Optional compulsory for MSc Physical Geography: Environmental History
<b>Duration / semester</b>	1 semester / winter semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Fundamentals of soil physics
<b>Content</b>	Components of soils and their properties, interaction matrix – soil water, soil water retention curve, water transport in saturated and unsaturated soil, transport of pollutants and tracers
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-1-M1-04 Atmospheric Chemistry I
<b>Module assignment / Responsible for the module</b>	Module section 1 / Basics PD Dr. Annette Ladstätter-Weißenmayer / Prof. Dr. Mihalis Vrekoussis
<b>Appendant courses, course type and SWH</b>	Atmospheric Chemistry I (4 semester weekly hours (SWH) / 2x lecture (L) + 2x example classes (EC))
<b>Workload / credit points</b>	6 CP, 180 h <ul style="list-style-type: none"> <li>• presence (L + EC): 56 h (4 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 56 h (4 SWH x 14 weeks)</li> <li>• preparation for exam: 68 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Basics chemistry of the atmosphere
<b>Content</b>	History of the atmospheres of the earth; atmospheric composition; thermodynamics, thermochemistry and chemical equilibria; photochemistry; kinetic theory of reactions and reaction rate coefficients; chain reactions; atmospheric chemical mechanisms and transformations in the thermosphere, mesosphere, stratosphere and the troposphere.
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes
<b>Literature</b>	<ul style="list-style-type: none"> <li>• Finlayson-Pitts B. J. and J. N. Pitts, Atmospheric Chemistry</li> <li>• Richard P. Wayne, Chemistry of Atmospheres, Oxford University Press, 1991</li> <li>• Ann M. Holloway and Richard P. Wayne, Atmospheric Chemistry, RSC Publishing, 2010</li> <li>• P. W. Atkins, Physical Chemistry, Oxford University Press, 1990</li> <li>• Colin Baird, Environmental Chemistry, Freeman and Company, New York, 1995</li> <li>• Guy Brasseur and Susan Solomon, Aeronomy of the Middle Atmosphere, D. Hobbs Atmospheric Science (Second Edition): An Introductory Survey</li> </ul>

<b>Module title / code no.</b>	01-M01-2-M1-06 Climate System I
<b>Module assignment / Responsible for the module</b>	Module section 1 / Basics Prof. Dr. Torsten Kanzow
<b>Appendant courses, course type and SWH</b>	Climate System I (3 semester weekly hours (SWH) / 2x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	4 CP, 120 h <ul style="list-style-type: none"> <li>• presence (L + EC): 42 h (3 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 42 h (3 SWH x 14 weeks)</li> <li>• preparation for exam: 36 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Climate physics
<b>Content</b>	Climate on earth / climate variations / the climate system / energy balance models / radiation & convection / role of the ocean in climate
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-1-M2-01 Dynamics I
<b>Module assignment / Responsible for the module</b>	Module section 2 / Theoretical Basics Prof. Dr. Thomas Jung
<b>Appendant courses, course type and SWH</b>	Dynamics I (4 semester weekly hours (SWH) / 2x lecture (L) + 2x example classes (EC))
<b>Workload / credit points</b>	6 CP, 180 h <ul style="list-style-type: none"> <li>• presence (L + EC): 56 h (4 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 56 h (4 SWH x 14 weeks)</li> <li>• preparation for exam: 68 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Understanding of the basic dynamical processes in atmosphere and ocean
<b>Content</b>	Governing equations, conservation laws, balances, circulation and vorticity, large-scale circulation, planetary boundary layer, Rossby waves
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M2-02 Dynamics II
<b>Module assignment / Responsible for the module</b>	Module section 2 / Theoretical Basics Prof. Dr. Gerrit Lohmann
<b>Appendant courses, course type and SWH</b>	Dynamics II (3 semester weekly hours (SWH) / 2x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	4 CP, 120 h <ul style="list-style-type: none"> <li>• presence (L + EC): 42 h (3 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 42 h (3 SWH x 14 weeks)</li> <li>• preparation for exam: 36 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Advanced dynamics of the ocean and atmosphere, applications in the fields of climate dynamics and fluid mechanics.
<b>Content</b>	Fluid dynamics, ocean circulation, atmosphere dynamics and teleconnections, bifurcations and instabilities, waves
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes
<b>Literature</b>	<ul style="list-style-type: none"> <li>• Holton, J.R., Introduction to Dynamical Meteorology, Academic Press</li> <li>• Gill, A., Atmosphere-Ocean Dynamics, Academic Press</li> <li>• Dutton, J.A., The Ceaseless Wind, Dover</li> <li>• Olbers, D.J., et al., Ocean Dynamics, Springer</li> <li>• Cushman-Roisin, B. &amp; Beckers, J.-M., Introduction to Geophysical Fluid Dynamics: Physical and Numerical Aspects</li> <li>• Marchal, J., and R. A. Plumb, 2008. Atmosphere, Ocean and Climate Dynamics: An Introductory Text. Academic Press, 344 pp; videos</li> <li>• Stewart, R. H., 2008: Introduction To Physical Oceanography,</li> <li>• Lohmann, G., 2014: Ocean Fluid Dynamics: Concepts, Scaling and Multiple Equilibria.</li> </ul>

<b>Module title / code no.</b>	01-M01-1-M2-03 Inverse Methods and Data Analysis
<b>Module assignment / Responsible for the module</b>	Module section 2 / Theoretical Basics Prof. Dr. Reiner Schlitzer / Prof. Dr. Emily King
<b>Appendant courses, course type and SWH</b>	Inverse Methods and Data Analysis (4 semester weekly hours (SWH) / 2x lecture (L) + 2x example classes (EC))
<b>Workload / credit points</b>	6 CP, 180 h <ul style="list-style-type: none"> <li>• presence (L + EC): 56 h (4 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 56 h (4 SWH x 14 weeks)</li> <li>• preparation for exam: 68 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Introduction to linear inverse methods
<b>Content</b>	Error analysis and statistics, techniques for the optimal solution of under and over determined systems of linear equations including methods for calculating variances and covariances of the solutions, concepts of resolution and methods to calculate them, practical examples and applications to test data sets from oceanography, image processing and atmospheric remote sensing
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M3-01 Remote Sensing I
<b>Module assignment / Responsible for the module</b>	Module section 3 / Experimental Techniques Prof. Dr. Astrid Bracher / Dr. Mathias Palm
<b>Appendant courses, course type and SWH</b>	Remote Sensing I (3 semester weekly hours (SWH) / 2x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	4 CP, 120 h <ul style="list-style-type: none"> <li>• presence (L + EC): 31,5 h (2,25 SWH x 14 weeks)</li> <li>• preparation report (each student 1x per semester): 16,5 h</li> <li>• preparation, learning + examples: 42 h (3 SWH x 14 weeks)</li> <li>• preparation for exam: 30 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik Optional compulsory for MSc Physical Geography: Environmental History
<b>Duration / semester</b>	1 semester / summer semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Basics of radiative transfer, spectroscopy, retrieval techniques, satellite remote sensing, MW, IR and UV-VIS techniques in atmospheric remote sensing, sea ice remote sensing, ocean color remote sensing
<b>Content</b>	The course introduces the theoretical background of remote sensing methods (interaction of electromagnetic radiation with matter (spectroscopy), radiative transfer, principles of satellite remote sensing). Active (radar, lidar) and passive (thermal emission, backscattered light) remote sensing techniques and their data analysis (retrievals) are explained. This is illustrated by a large number of examples available and in use in the different research groups in the Institute of Environmental Physics (IUP).
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes (exercises, report of one course lesson (5-10 min.))
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M3-02 Measurement Techniques
<b>Module assignment / Responsible for the module</b>	Module section 3 / Experimental Techniques Dr. Andreas Richter / Dr. Christian Mertens
<b>Appendant courses, course type and SWH</b>	Measurement Techniques (4 laboratory (Lab) + 1 lecture (L))
<b>Workload / credit points</b>	6 CP, 180 h <ul style="list-style-type: none"> <li>• presence (L): 18 h (6 SWH x 3 weeks)</li> <li>• presence (Lab): 24 h (6 SWH x 4 weeks)</li> <li>• preparation, report: 84 h (12 SWH x 7 weeks)</li> <li>• preparation for exam: 54 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics
<b>Duration / semester</b>	1 semester / summer semester (1st academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Basics of measurement techniques in Environmental Physics
<b>Content</b>	Measurements of meteorological quantities, atmospheric trace gases, ocean currents, environmental radioactivity, absorption cross-sections
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Oral exam Course performance: Successful experiments with accepted reports
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-1-M4-02 Global Carbon Cycle
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Dr. Christoph Völker
<b>Appendant courses, course type and SWH</b>	Global Carbon Cycle (2 semester weekly hours (SWH) / 1,5x lecture (L) + 0,5x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Understanding the interactions between the cycling of carbon and global climate
<b>Content</b>	<ul style="list-style-type: none"> <li>• natural and anthropogenic greenhouse effect</li> <li>• different reservoirs of carbon in the earth system, and their role on different time-scales</li> <li>• role of carbon in the chemistry of the ocean and in setting its pH</li> <li>• glacial-interglacial cycles</li> <li>• carbon isotopes as analytical tool</li> <li>• weathering, climate regulation and the carbon cycle on geological time-scales</li> </ul>
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	<ul style="list-style-type: none"> <li>• Principles of Planetary Climate: Raymond Pierrehumbert</li> <li>• Ocean Biogeochemical Dynamics: Jorge L. Sarmiento &amp; Nicolas Gruber</li> <li>• Earth's Climate: Past and Future: William F. Ruddiman</li> </ul>

<b>Module title / code no.</b>	01-M01-1-M4-04 Cloud Physics
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics PD Dr. Ulrike Wacker
<b>Appendant courses, course type and SWH</b>	Cloud Physics (2 semester weekly hours (SWH) / 1x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Fundamentals of cloud physics
<b>Content</b>	Microstructure of clouds and precipitation, evolution of drops and ice particles due to nucleation, condensation/deposition, coagulation, riming, melting and sedimentation, treatment in complex numerical prediction models.
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M4-07 General Meteorology
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics PD Dr. Ulrike Wacker
<b>Appendant courses, course type and SWH</b>	General Meteorology (2 semester weekly hours (SWH) / 1x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Fundamentals of general meteorology
<b>Content</b>	Typical flow patterns of the atmosphere, static (in-)stability, circulation systems, cyclones in mid-latitudes.
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M4-08 Digital Image Processing
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Dr. Christian Melsheimer / Dr. Gunnar Spreen
<b>Appendant courses, course type and SWH</b>	Digital Image Processing (2 semester weekly hours (SWH) / 1,5x lecture (L) + 0,5x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Fundamentals of digital image processing
<b>Content</b>	<ul style="list-style-type: none"> <li>• Digital image, sampling</li> <li>• Image enhancement using filters</li> <li>• Image analysis methods using segmentation, feature extraction and classification</li> <li>• Fourier transformation of digital image, linear filters in spatial and frequency domains</li> <li>• Data compression</li> </ul>
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M4-12 Statistics and Error Analysis
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Prof. Dr. Reiner Schlitzer
<b>Appendant courses, course type and SWH</b>	Statistics and Error Analysis (2 semester weekly hours (SWH) / 1,5x lecture (L) + 0,5x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Introduction to statistics, error calculation and data analysis
<b>Content</b>	Random variables, probability, density and distribution functions, expectation values, covariance and correlation, error propagation, statistical tests
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M4-13 Environmental Radioactivity
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Dr. Helmut Fischer
<b>Appendant courses, course type and SWH</b>	Environmental Radioactivity (2 semester weekly hours (SWH) / 1x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik Optional compulsory for MSc Physical Geography:Environmental History
<b>Duration / semester</b>	1 semester / summer semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Fundamentals of environmental radioactivity
<b>Content</b>	Radioactive decay and emitted radiation, origins of environmental radioactivity, interaction of radiation and matter, detection methods, transport processes, radiometric dating, examples from research projects
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M4-17 Mathematical Modelling
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Dr. Silke Thoms
<b>Appendant courses, course type and SWH</b>	Mathematical Modelling (2 semester weekly hours (SWH) / 1x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Ability to understand and analyze models, their behaviour and the fundamental numerical techniques used in them
<b>Content</b>	Steps in the development of a model Types of behaviour of linear / nonlinear dynamical systems Basic numerical techniques: - iterative solution of algebraic equations - solution of difference equations and ordinary differential equations - methods to solve partial differential equations - optimization methods
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	<ul style="list-style-type: none"> <li>• Modeling Methods for Marine Science: David M. Glover, William J. Jenkins, Scott C. Doney</li> <li>• Numerical Recipes: William H. Press, Saul Teukolsky, William T. Vetterling und Brian P. Flannery</li> </ul>

<b>Module title / code no.</b>	01-M01-1-M4-19 Microwave Remote Sensing
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Dr. Christian Melsheimer / Dr. Gunnar Spreen
<b>Appendant courses, course type and SWH</b>	Microwave Remote Sensing (2 semester weekly hours (SWH) / 1,5x lecture (L) + 0,5x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Fundamentals of remote sensing using microwaves
<b>Content</b>	<ul style="list-style-type: none"> <li>• Microwaves</li> <li>• Microwave antennas, working principle of radiometers and radars</li> <li>• Interaction of microwaves with the atmosphere and the earth surface, radiative transfer</li> <li>• Retrieval of geophysical parameters from microwave measurements</li> <li>• Current microwave instruments and satellites</li> </ul>
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M4-22 Physical Oceanography II
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Prof. Dr. Monika Rhein
<b>Appendant courses, course type and SWH</b>	Physical Oceanography II (2 semester weekly hours (SWH) / 1x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Special topics physical oceanography
<b>Content</b>	Tides, waves, energy dissipation, small scale processes and their importance for the large scale circulation
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-1-M4-24 Climate II
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Prof. Dr. Gerrit Lohmann / Dr. Martin Werner
<b>Appendant courses, course type and SWH</b>	Climate II (2 semester weekly hours (SWH) / 1,5x lecture (L) + 0,5x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 42 h (3 SWH x 14 weeks)</li> <li>• preparation for exam: 20 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Advanced climate course: Theories, models, observations
<b>Content</b>	Climate models, possibilities and limitations to observe climate change, ice ages, holocene, scenarios, sea level, proxy data, biogeochemical cycles, feedbacks
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	<ul style="list-style-type: none"> <li>• Bradley, Paleoclimatology-Reconstructing climates of the Quaternary, 1999</li> <li>• Saltzman, Dynamical Paleoclimatology - A generalized theory of global climate change, Academic Press, San Diego, 2002</li> <li>• Ruddiman, Earth's Climate Past and Future</li> <li>• Paleoclimate, Global Change and the Future, 2003 by Keith D. Alverson, Raymond S. Bradley, Thomas F. Pedersen (Editors)</li> <li>• Broecker, THE GLACIAL WORLD ACCORDING TO WALLY</li> </ul>

<b>Module title / code no.</b>	01-M01-1-M4-33 Ocean Optics and Ocean Color Remote Sensing
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Prof. Dr. Astrid Bracher
<b>Appendant courses, course type and SWH</b>	Ocean Optics and Ocean Color Remote Sensing (2 semester weekly hours (SWH) / 1,5x lecture (L) + 0,5x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation essay + short talk: 34 h</li> <li>• preparation for exam: 28 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Basics of radiative transfer in water (inherent and apparent properties) and ocean color remote sensing, ocean optics measurement techniques, atmospheric correction, empirical, semi-analytical, neuronal network retrieval techniques to determine water constituents and radiation in the water, validation and application techniques
<b>Content</b>	First, the course covers the principles of ocean optics. Topics included are basic physics of light and interaction of light with matter, inherent and apparent optical properties, radiative transfer equation, light fields within the ocean, water-leaving radiance and remote-sensing reflectance, effects of various seawater constituents on ocean reflectance, optical instrumentation and measurement techniques. Secondly, the lecture focuses on ocean color remote sensing. This includes the principles of ocean color remote sensing, the technology of the instruments commonly used ocean color satellite sensors, atmospheric correction, retrieval techniques of ocean color data products, such as phytoplankton biomass, phytoplankton photosynthetic activity, major PFTs, other particulates, coloured dissolved organic matter and light penetration depth. Finally, also validation techniques of ocean color data products and application of these data in global ecosystem and biogeochemical models is presented.
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-1-M4-40 Chemistry and Dynamics of the Ozone Layer
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics PD Dr. Markus Rex / PD Dr. Björn-Martin Sinnhuber
<b>Appendant courses, course type and SWH</b>	Chemistry and Dynamics of the Ozone Layer (block course)
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 40 h (block course 5 days)</li> <li>• preparation, learning + examples: 25 h</li> <li>• preparation for exam: 25 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Understanding of chemistry-dynamics-interactions including numerical techniques
<b>Content</b>	Dynamics and chemistry of the ozone layer, implementation of a numerical model of the ozone layer and model based analyses
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M4-41 Molecular Physics
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Prof. Dr. Justus Notholt
<b>Appendant courses, course type and SWH</b>	Molecular Physics (2 semester weekly hours (SWH) / 1,5x lecture (L) + 0,5x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Basics of spectroscopy, understanding and interpretation of measured spectra with regard to the structure of the molecules. Basics of the FTIR-spectroscopy, understanding of remote sensing methods.
<b>Content</b>	Prismen and grating spectrometers, Fourier-Transform-Spectroscopy, transitions, rotational spectra, vibrational spectra, rotational-vibrational spectra, remote sensing methods
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M4-44 Polar Oceanography
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Prof. Dr. Torsten Kanzow
<b>Appendant courses, course type and SWH</b>	Polar Oceanography (2 semester weekly hours (SWH) / 1,5x lecture (L) + 0,5x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Introduction to polar oceanography
<b>Content</b>	Properties of cold sea water, sea ice formation, ocean – sea ice interaction, arctic circulation and water mass formation, antarctic circulation and water mass formation, ocean – ice shelf interaction
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-1-M4-46 Aerosol and Radiative Aspects in Clouds
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Dr. Marco Vountas / Dr. Luca Lelli
<b>Appendant courses, course type and SWH</b>	Aerosol and Radiative Aspects in Clouds (2 semester weekly hours (SWH)/ 1,5x lecture (L) + 0,5x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Advanced knowledge of the atmosphere and light scattering
<b>Content</b>	Description of atmospheric aerosols, their composition and measuring methods. Introduction to radiative transfer in the troposphere with emphasis on aerosols and clouds
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-2-M4-47 Atmospheric Chemistry II
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics PD Dr. Annette Ladstätter-Weißenmayer
<b>Appendant courses, course type and SWH</b>	Atmospheric Chemistry II (2 semester weekly hours (SWH) / 1x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / summer semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	Advanced Atmospheric Chemistry II
<b>Content</b>	Global biochemical cycles of elements, important biophysical processes in atmosphere and ocean, carbon-, methane-, nitrogen and water cycle, greenhouse gases
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-1-M4-48 Instrumental Techniques for Environmental Measurements
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Prof. Dr. Mihalīs Vrekoussis
<b>Appendant courses, course type and SWH</b>	Instrumental Techniques for Environmental Measurements (2 semester weekly hours (SWH)/1x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 28 h (2 SWH x 14 weeks)</li> <li>• preparation for exam: 34 h</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences Optional compulsory for MSc Technomathematik
<b>Duration / semester</b>	1 semester / winter semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Students are expected to enhance their knowledge on the theoretical aspects, design and operation of a number of instruments used in environmental analysis. Ultimately, students will improve their analytical thinking by recognizing and understanding the advantages and disadvantages of the environmental instrumental methods to be used depending on the material under investigation.
<b>Content</b>	Theoretical aspects on spectroscopy, chromatography, electrochemistry. Introduction to the principle of operation and design of instruments used in environmental analysis.
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Written exam/oral exam (will be announced by the respective lecturer) Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Quantitative chemical analysis, 8 <sup>th</sup> edition, (Daniel. C. Harris) Modern Analytical Chemistry, 1st Edition (Harvey, David)

<b>Module title / code no.</b>	01-M01-1-M4-49 Practical Data Analysis with Python
<b>Module assignment / Responsible for the module</b>	Module section 4 / Advanced Environmental Physics Dr. Andreas Hilboll
<b>Appendant courses, course type and SWH</b>	Practical Data Analysis with Python (2 semester weekly hours (SWH) / 1x lecture (L) + 1x example classes (EC))
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L + EC): 28 h (2 SWH x 14 weeks)</li> <li>• preparation, learning + examples: 26 h (2 SWH x 13 weeks)</li> <li>• homework projects (examination): 36 h (18 SWH x 2)</li> </ul>
<b>Compulsory / optional</b>	Optional
<b>Assignment to study programmes</b>	Optional for MSc Environmental Physics Optional compulsory for MSc Physik Optional compulsory for MSc Marine Geosciences
<b>Duration / semester</b>	1 semester / winter semester
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Upon successful completion of this course, the student will be able to choose the appropriate method for his/her data analysis problem. He/she will be able to use the Python scientific programming ecosystem for analysis of the dataset at hand, while following scientific programming best practices (e.g., version control, documentation, ...).
<b>Content</b>	<p>The introductory part of the course will touch on the following subjects:</p> <ul style="list-style-type: none"> <li>- "But this worked yesterday, before I made some changes ...", or: an introduction to version control.</li> <li>- Getting started: How to setup your own computer for data analysis in Python.</li> <li>- Hands-on introduction to the Python scientific ecosystem: Arrays and mathematical operations.</li> <li>- Labeled arrays, or how to intuitively work with data.</li> <li>- Reading and writing data in common file formats.</li> <li>- Making both beautiful and meaningful plots from data.</li> <li>- An overview of the most common special-topic libraries for the research areas covered by the students' study programmes.</li> </ul> <p>In its second part, the course will focus on a practical introduction to the most common data analysis tasks, like, among others, curve fitting, parameter estimation, and correlation analysis.</p>
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: Two graded homework projects Course performance: Successful assessment of example classes and/or successful writing of an essay
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	01-M01-1-M5-06 Proseminar on Presentation Techniques in Environmental Physics
<b>Module assignment / Responsible for the module</b>	Module section 5 / Research in Environmental Physics Dr. Andreas Richter
<b>Appendant courses, course type and SWH</b>	Proseminar on Presentation Techniques in Environmental Physics (2 PS)
<b>Workload / credit points</b>	3 CP, 90 h <ul style="list-style-type: none"> <li>• presence (L): 28 h (2 SWH x 14 weeks)</li> <li>• preparation of two talks: 40 h (20 h/week x 2 weeks)</li> <li>• preparation of one poster / extended abstracts: 22 h</li> </ul>
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics
<b>Duration / semester</b>	1 semester / winter semester (2nd academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	Presentation techniques in environmental physics
<b>Content</b>	Structure and content of oral presentations, slides, giving oral presentations, questions and answers, posters, extended abstracts, literature research and citation
<b>Course and examination performance, type of exam</b>	Combination exam Examination performance: 1 poster or extended abstract (4 pages) Course performance: Successful assessment of 2 oral presentations
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	Preparatory Project
<b>Module assignment / Responsible for the module</b>	Module section 5 / Research in Environmental Physics Prof. Dr. John P. Burrows, Prof. Dr. Justus Notholt, Prof. Dr. Monika Rhein, PD Dr. Annette Ladstätter-Weißemayer as well as further university lecturers of the IUP (Institute of Environmental Physics) / AWI (Alfred Wegener Institute for Polar and Marine Research) depending on the area of research
<b>Appendant courses, course type and SWH</b>	Working in the laboratories of the Institute of Environmental Physics / AWI Individual instruction (practical training) Preparation of a thesis paper on a possible research project which - as a rule - should be closely related to the subsequent Master's Thesis.
<b>Workload / credit points</b>	18 CP, 540 h
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics
<b>Duration / semester</b>	Winter semester (2nd academic year)
<b>Requirements for participation</b>	None
<b>Offered frequency</b>	Annually / winter semester
<b>Course language</b>	English
<b>Learning outcome</b>	<ul style="list-style-type: none"> <li>• Transfer of a scientific problem/question into an experimental and/or theoretical study</li> <li>• Successful strategies for the planning and conducting of scientific studies</li> <li>• Summarize and present preliminary scientific results in a thesis paper</li> </ul>
<b>Content</b>	The content is related to the respective area of research of the preparatory project.
<b>Course and examination performance, type of exam</b>	Module examination <ul style="list-style-type: none"> <li>• Successful assessment of the preparatory project</li> <li>• Thesis paper on research project which can be conducted within the context of the Master's Thesis</li> </ul>
<b>Literature</b>	Will be announced in the respective course.

<b>Module title / code no.</b>	Module Master's Thesis
<b>Module assignment / Responsible for the module</b>	Module 6 / Final Module Prof. Dr. John P. Burrows, Prof. Dr. Justus Notholt, Prof. Dr. Monika Rhein, PD Dr. Annette Ladstätter-Weißenmayer as well as further university lecturers of the IUP (Institute of Environmental Physics) / AWI (Alfred Wegener Institute for Polar and Marine Research) depending on the area of research
<b>Appendant courses, course type and SWH</b>	Master's Thesis Colloquium to the Master's Thesis
<b>Workload / credit points</b>	30 CP, 900 h
<b>Compulsory / optional</b>	Compulsory
<b>Assignment to study programmes</b>	Compulsory for MSc Environmental Physics
<b>Duration / semester</b>	1 semester / summer semester (2nd academic year)
<b>Requirements for participation</b>	Required for the application for the Master's Thesis is the passing of all the mandatory exams of the module sections 1 – 3 and the module "preparatory project".
<b>Offered frequency</b>	Annually / summer semester
<b>Course language</b>	English
<b>Learning outcome</b>	<ul style="list-style-type: none"> <li>• Transfer of a scientific problem/question into an experimental and/or theoretical study</li> <li>• Successful strategies for the planning and conducting of scientific studies</li> <li>• Ability for a critical evaluation, assessment and discussion of own scientific results</li> <li>• Summarize and present scientific results in a Master's Thesis</li> </ul>
<b>Content</b>	The content is related to the respective area of research of the Master's Thesis.
<b>Course and examination performance, type of exam</b>	<ul style="list-style-type: none"> <li>• Successful assessment of the Master's Thesis</li> <li>• Successful colloquium to the Master's Thesis</li> <li>• Credit points for the finale module are granted on the basis of the marks for the Master's Thesis and the colloquium.</li> </ul>
<b>Literature</b>	Will be announced in the respective course.
